ZOOMMED SIGNS A LICENSE AND DISTRIBUTION AGREEMENT WITH EMERGIS INC.

Montreal, May 24, 2006 - M. Yves Marmet, President and Chief Executive Officer of **ZoomMed Inc.** (TSX-V: ZMD), is very proud to announce that the corporation signed a license and distribution agreement with Emergis Inc.

Mr. Marmet declared: "This transaction marks another important step in our partnership development strategy to facilitate the marketing of our product. This agreement aims to integrate **ZoomMed's** "ZRx Prescriber" to the Emergis therapeutic advisor data base, known as "SantéXpert™", which includes different functionalities such as drug interactions, counter-indications, pathological and medical classifications and treatment alternatives."

The ZRx Prescriber allows doctors to write prescriptions and send them electronically to pharmacists, and allows pharmacists to view those prescriptions on-line and confirm them electronically. The ZRx Prescriber provides an interactive access to the patient's pharmacological profile and prescription help tools. It will also allow doctors to electronically validate, with insurance companies, whether the patient prescribed medication is covered. In fact, it is a system which aims at improving information accessibility and collaboration among the different actors of this sector, thus creating a more secure and efficient prescription drug management, which will benefit patients, government, doctors, pharmacists, insurers and pharmaceutical companies.

As previously announced, **ZoomMed** signed on February 9, 2006, a commercial collaboration agreement with ADN Medical www.adnmedical.com, which has been offering computer services to doctors in Québec for more than 15 years. With this agreement, **ZoomMed** has direct access to the actual clients of ADN Medical, that is to say 4,500 doctors throughout Québec, which will propel the deployment of the "ZRx Prescriber"
