ZOOMMED: ZRx PRESCRIBER'S PILOT PROJECT.

Montreal, July 4, 2006 - ZoomMed inc. (TSX Venture: ZMD) is proud to announce that on June 1, 2006, as planned on its timetable, **Zoommed** implemented at the **Clinique Familiale de Ste-Hyacinthe** a first pilot site using the "ZRx Prescriber". The first electronic prescriptions were generated by doctors and processed by different pharmacists. Many pharmacies, located in this region, are already collaborating to the project.

Other pilot projects are planned in July and August in different clinics throughout Quebec. In the course of these projects, our goal remains to validate and confirm the functionalities of our product within the medical community. We expect the "ZRx Prescriber" to be deployed in September 2006.

ZoomMed would like to thank pharmaceutical corporations such as **ASTRAZENECA** (www.astrazeneca.ca), one of the world leading pharmaceutical companies and **BERLEX Canada** (www.berlex.ca), a quality leader in the fields of Gynecology & Andrology, Oncology, Diagnostic Imaging, and Specialized Therapeutics for their support in these projects.

Actively contributing is **ADN Medical** (www.adnmedical.com) in accordance with a commercial collaboration agreement signed in February 2006. ADN Medical has been offering computer services, for more than 15 years, to 4,500 doctors in Quebec.

Product

ZoomMed has developed a new electronic tool, aiming at changing the way drugs are prescribed and dispensed throughout Canada. The "ZRx Prescriber" allows a doctor to fill out and electronically send prescription information to pharmacists, allowing them to view this information on-line and to confirm it with the signed prescription. This user friendly Web product, designed for doctors, uses the latest "Pocket Pc" technologies.

As previously announced on May 2006, **ZoomMed** signed a commercial agreement with **EMERGIS INC.** (www.emergis.ca). This agreement gave **Zoommed** the right to integrate Emergis therapeutic advisor data base, known as "SantéXperttm", to the "ZRx Prescriber". Emergis provides management systems to more than 2,900 pharmacies representing 40% of the market throughout Canada, of which 1,000 within Quebec province.
